=> 48 upload / day

And
the battery is still
charging during the
period ...

from 3,75 V to 3,78 V

I have to find a solution!

No more beer

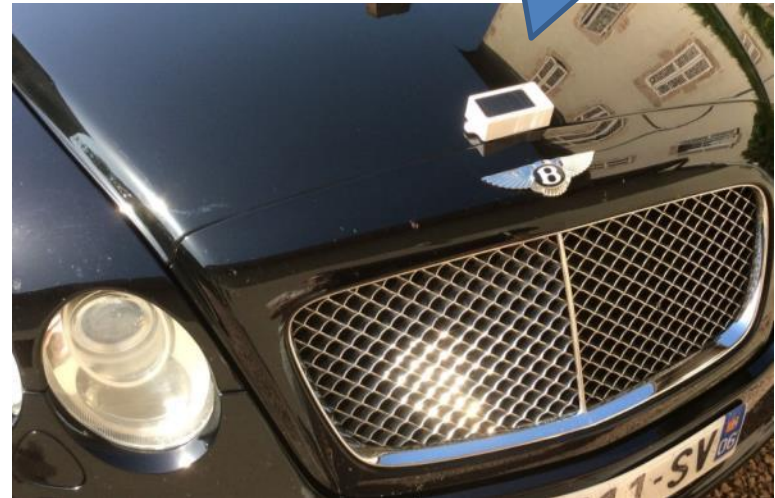

The fridge is empty now.

I could sleep inside it ...

Ready for the road trip

Looking for the best place to live !

I hang on here for live...

The cooler place to live ...

The End !

2 weeks of record and 24 uploads / day - The Battery charge remains constant
